1.	This international preliminary r International Searching Authori	report on patentability (Chapter I) is issued by the International Bureau on behalf of the ity under Rule 44 bis. I(a).
2.	This REPORT consists of a total	al of 8 sheets, including this cover sheet.
	In the attached sheets, any refer to the international preliminary	rence to the written opinion of the International Searching Authority should be read as a reference report on patentability (Chapter I) instead.
3.	This report contains indications	s relating to the following items:
	Box No. I	Basis of the report
	Box No. II	Priority
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	Box No. IV	Lack of unity of invention
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited
	Box No. VΠ	Certain defects in the international application
	Box No. VIII	Certain observations on the international application
4.	The International Bureau will conot, except where the applicant date (Rule 44bis .2).	ommunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority

Box	No. I	Basis of this opinion
I.	With	regard to the language, this opinion has been established on the basis of the international application in the language in which it was , unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language
	-	, which is the language of a translation furnished for the purposes of international search (under
		Rule 12.3 and 23.1(b)).
2.	With	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed nation, this opinion has been established on the basis of:
	a.	type of material
		a sequence listing
		table(s) related to the sequence listing
	Ь.	format of material
		in written format
		in computer readable form
	c.	time of filing/furnishing
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.	L	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

1.	The following document has not yet been furnished:
	copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).
	translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).
	Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.
2.	This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

appear novel over document D2 (PCT Article 33(2)). Reference is made to the fact that the subject matter of claim 25, in addition, does not appear to differ from known polymer solutions carrying aldehyde groups.

- 4. The present application does not meet the requirements of PCT Article 33(1), because the subject matter of claims 10-20 and 24 is not based on an inventive step (Article 33(3)).
- 4.1 The document D2 is considered the closest prior art to the subject matter of claims 9 and 10 and differs by the polymer used.

In the application, the production of a dextran aldehyde haemostyptic was shown. Since the prior art gives no indication of such solid porous and absorbent haemostyptics, the subject matter of claim 9 appears to be inventive over the documents D2 and D3.

Since there is no indication in the application that the problem can also be solved using the structurally very different polyethylene glycol, the subject matter of claim 10 is not considered as inventive.

4.2 The (dependent) claims 11-20 and 24 do not contain any features which, in combination with the features of any claim to which they refer back, meet the PCT requirements for inventive step.
